

Access App Exercise

Mission

Create an App which shows the GitHub users in a List

GitHub API Documentation:

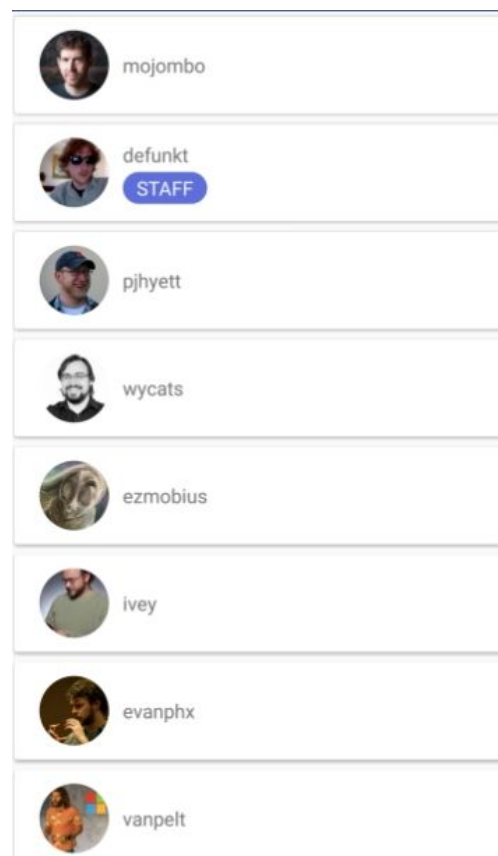

- List - <https://developer.github.com/v3/users/#get-all-users>
- Pagination - <https://developer.github.com/v3/#link-header> (optional)

Take Note:

- Please use MVVM architecture to do it.
- 3rd party libs(ex: httpRequetst, imageProcess...etc) are allowed to use
- If anything in the exercise is unspecified and you need to make assumptions, feel free to do it.
- Pagination is a “bonus” items. Please feel free to ignore it.
- Once finish the exercise, please add a readMe.txt to explain.
- Anything about UI Spec(size, margin , padding, icon...etc) Please feel free to set.

The List UI will look like:

- avatar_url
- login
- site_admin (badge)
- Number of items
- Paginated (optional)
- start with since=0, page size = 20
- Non-paginated
- Limit to 100 users

Bonus Stage(Please feel free to ignore it if there are no free time)

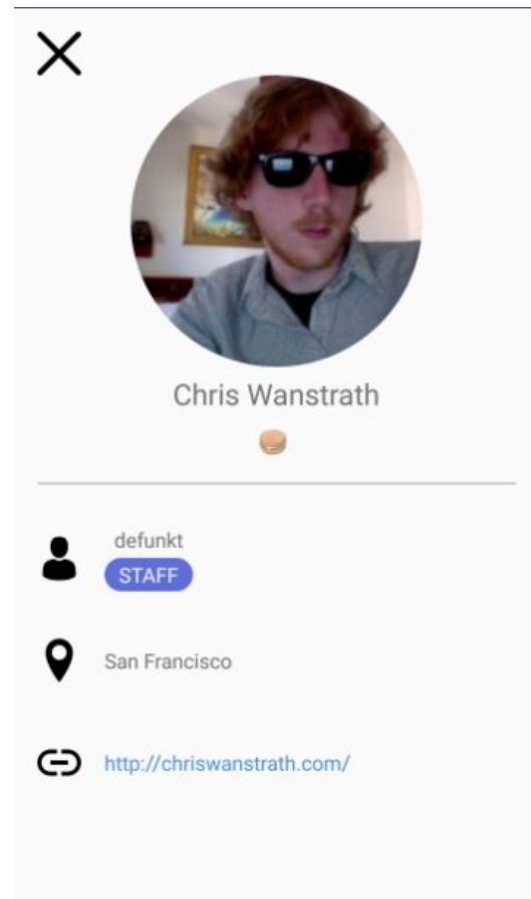

- Detail <https://developer.github.com/v3/users/#get-a-single-user>

The Detail will look like:

Upon clicking, the login Detail UI will be shown

The Detail UI will look like:

- User details:
- avatar_url
- name
- bio
- login
- site_admin
- location
- blog

Sending the Results to Access:

- Please Upload the result to Github and send back the Git Repo
